

ABSTRACT

There is provided an aqueous liquid pharmaceutical
5 composition which comprises Gatifloxacin (chemical nomenclature:
 (\pm) -1-cyclopropyl-6-fluoro-1,4-dihydro-8-methoxy-7-(3-methyl-
1-piperazinyl)-4-oxo-3-quinoline carboxylic acid) or its salt and
disodium edetate. Further, there are provided a method for raising
corneal permeability of Gatifloxacin, a method for preventing
precipitation of Gatifloxacin crystals, and a method for preventing
10 coloration of Gatifloxacin by incorporating disodium edetate into
an aqueous liquid preparation containing Gatifloxacin or its salt.
